

DATASHEET

What's New in Sage 300 2021

Work seamlessly with a single shared set of company data.

Sage 300 2021 makes it easy for you to focus on running your business with increased efficiency and meeting the evolving expectations of today's business world. The latest version offers enhanced user experience through improved web screens, payments acceptance, and the latest in tax reporting.

What's new in 2021.0

Released September 2020

Accept payments through online providers

- You can now accept payments from your customers through online payment service providers such as PayPal and Stripe. If you use this feature, invoices include a Pay Now button that your customers can click to pay using any online provider you have set up for your company in Sage 300.

Set up tax withholdings for sales transactions.

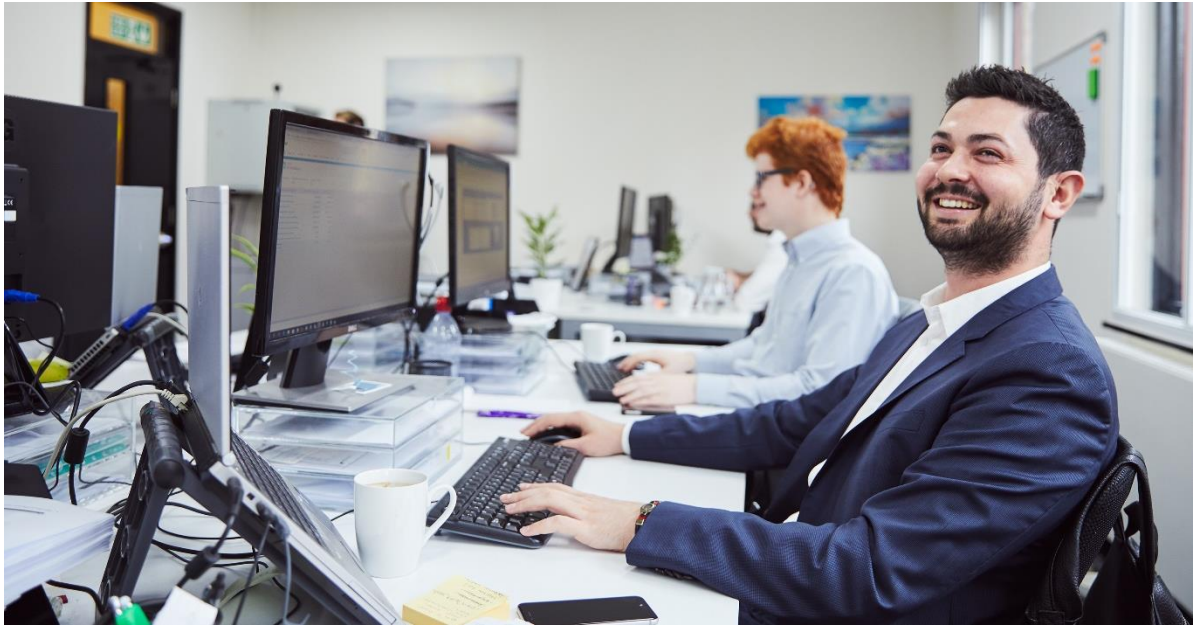

- Sage 300 can now withhold sales tax at the point of sale and record the amounts that your customer withholds for a transaction to remit to a tax authority on your behalf.

The new view is shaping up! This release sees new enhancements to web screens to make your life just a bit easier.

- A new Text Size setting lets you change the size of text on web screens to smaller sizes than the default “large.” Using smaller text lets you see more fields and controls without having to scroll down
- Specify BOM numbers on details for shipments, credit notes, and debit notes.
- Customize report printing so you can keep more web screens open. You can now customize web screens so that printed reports do not count as open screens.

What's new in 2021.1

Released November 2020

1099 Tax Reporting

1099 tax forms have been updated to comply with the latest codes and regulations. The 1099-NEC form can now be printed on the A/P Print 1099/1096 Forms screen.

Data Integrity Checks

We have improved the data integrity checks on web screens for integrated products.

Visual Process Flows

- Visual process flows have been updated and redesigned, so they no longer require Adobe Flash.
- See Sage article **107531** on [SageKB.com](https://www.sage.com/knowledgebase) for more details.

What's new in 2021.2

Released April 2021

New Web Screens

We have added several new web screens for Sage 300 subscription customers.

- General Ledger:** Account History Inquiry, Budget Maintenance, Source Currency Inquiry
- Accounts Receivable:** Receipt Inquiry, Refund Inquiry
- User Management**

Redesigned Finder for Transactions Web Screens

The new Finder improves filtering and makes it easier to navigate through large sets of results.

Improved Process for Printing Reports

When printing a report, a preview of the report is no longer displayed in the SAP Crystal Reports® viewer. Instead, the Export Report screen appears and provides options for saving the report to a file.

To print a physical copy of the report, save to a PDF and then print to your printer from the PDF.

Integration with Sage Data and Analytics

Powerful and easy to use, Sage Data and Analytics makes it easy to see into your data so you can make better-informed decisions about your business.
